A Powerful Addition

K97389US

Product Description

The iPad Air™ 2 is light and thin, which means you're probably looking for a thin, lightweight keyboard case that's loaded with features to go along with it. Kensington has your answer with the KeyFolio Thin X3 for iPad Air™ 2. The X3 features the breakthrough innovation PowerLift™, which allows you to tap into the keyboard's internal battery and charge your phone using its USB cable. A sleek and form-fitting, hard-shell exterior surrounds the tablet in protection while maintaining its thin profile. When the KeyFolio Thin X3 is opened, it reveals an integrated Bluetooth keyboard that features 6 rows of high-performance scissor keys, including a row of dedicated shortcut keys, allowing you to be more productive using fewer keystrokes. The unique QuickFold™ design allows you to hide the keyboard beneath the iPad Air™ 2 so you can quickly and easily transition from typing mode to viewing mode. The KeySense™ Power Channel automatically turns the keyboard on and off when it's engaged or disengaged from the magnetic stand, helping conserve battery life.
